

Weekly Climate & Actuarial Monitor (Supranational Orgs)

Report week of 2026-09-07 - 57 sites checked - 57 succeeded - 0 failed

Executive Summary

Across 24 updates, this week's evidence concentrated on scenario analysis and actuarial assumptions, resilience and parametric insurance, and natural catastrophe and physical risk.

New monitored-site developments include Second Lead Author Meeting of the Methodology Report 2027 Methodology Report on Carbon Dioxide Removal Technologies, Car and environmental and social sustainability framework.

Notable wider-intelligence items include SOA Research: Climate Risk and Insurance Actuarial Perspectives 2026 and IFRS S2 Climate Disclosure: Implications for Actuaries.

Across the evidence, recurring actuarial implications include scenario calibration and actuarial assumption setting, pricing, product design and protection-gap analysis, and catastrophe modelling, hazard trends and loss assumptions.

Monitoring Snapshot

Sites checked	57
Succeeded	57
Failed	0
Pillar A updates	19
Pillar B updates	5

* Monitored window: last 7 days (per-site check)

* Pillar B search window: last 3 months

* Total detected changes: 147 -> After relevance filter: 24 (removed 123 non-relevant, 0 in database)

* Across 13 filtered items, evidence concentrated on climate disclosure frameworks, parametric insurance innovation, and updated climate scenarios.

* Pillar A site changes include new climate risk publications, insurance regulation updates, and IPCC meeting announcements.

* Pillar B intelligence highlights SOA's climate risk research, IFRS S2 implications for actuaries, NGFS scenario updates, and World Bank's parametric insurance work.

* Recurring actuarial implications include: disclosure and reporting obligations under IFRS S2, scenario analysis updates for pricing and reserving, and growth of parametric insurance markets for climate adaptation.

Pillar A

1. Second Lead Author Meeting of the Methodology Report 2027 Methodology Report on Carbon Dioxide Removal Technologies, Car
2. environmental and social sustainability framework
3. Story THEME DEBUG THEME HOOK: 'views_view_field' BEGIN CUSTOM TEMPLATE OUTPUT from 'themes/custom/UNEP_3Spot/templates
4. It's another triple COP year: What that means and why it matters for business leaders
5. climate change in africa
6. who is on the ground in nepal responding to the devastating flash floods
7. 2026 rasuwa flash floods
8. flood tragedy nepal highlights cross border and cascading risks
9. advanced search.html?sort=descending&allq=&dpmtnt=Environment+and+Climate+Chang
10. actuarial report canada student financial assistance program 31 july 2025
11. processionary caterpillar outbreaks how sustax leverages c3s data assess climate
12. Linking landslide activity and ERA-5 hydroclimatic models to pro-active infrastructure management
13. SCO FLAude: Understanding extreme hydrometeorological events in Aude and Occitanie in the context of climate change
14. All case studies
15. strengthening urban resilience and disaster preparedness alexandria
16. media resilience and risk communication take centre stage lake chad basin
17. Media Release: Business and Biodiversity Assessment
18. 3 August 2026 - 31 December 2026 Final laid-out version of the Business and Biodiversity Assessment Report now available

19. ASTIN: The Benktander Golden Stairs and Other Parameter-Free Credibility Methods in Loss Reserving

Pillar B

1. SOA Research: Climate Risk and Insurance Actuarial Perspectives 2026

SOA research report on climate risk modeling for insurance pricing and reserving. Covers scenario analysis, mortality/morbidity impacts, and transition risk frameworks.

2. IFRS S2 Climate Disclosure: Implications for Actuaries

Analysis of IFRS S2 climate disclosure requirements and their impact on actuarial practice, including reporting obligations for insurers.

3. Parametric Insurance for Climate Adaptation in Developing Economies

World Bank brief on parametric insurance products for climate adaptation, including weather index insurance and catastrophe bonds.

4. NGFS Climate Scenarios for Financial Risk Assessment

Updated climate scenarios from the Network for Greening the Financial System, relevant for actuarial stress testing.

5. IPCC AR6: Implications for Actuarial Assumptions

IPCC Sixth Assessment Report findings relevant to actuarial assumptions: sea level rise, extreme weather frequency.
