

Weekly Climate & Actuarial Monitor (Supranational Orgs)

Report week of 2026-09-07 - 57 sites checked - 57 succeeded - 0 failed

Executive Summary

Across 285 updates, this week's evidence concentrated on resilience and parametric insurance, climate finance and investment, and scenario analysis and actuarial assumptions.

New monitored-site developments include AR7 Climate Change: Impacts, Adaptation and Vulnerability and AR7 Climate Change: The Physical Science Basis.

Notable wider-intelligence items include SOA Research: Climate Risk and Insurance Actuarial Perspectives 2026 and IFRS S2 Climate Disclosure: Implications for Actuaries.

Across the evidence, recurring actuarial implications include pricing, product design and protection-gap analysis, investment classification and capital allocation, and scenario calibration and actuarial assumption setting.

Monitoring Snapshot

Sites checked	57
Succeeded	57
Failed	0
Pillar A updates	280
Pillar B updates	5

* Monitored window: last 7 days (per-site check)

* Pillar B search window: last 3 months

* Total detected changes: 315 -> After relevance filter: 285 (removed 25 non-relevant, 5 in database)

* Across 13 filtered items, evidence concentrated on climate disclosure frameworks, parametric insurance innovation, and updated climate scenarios.

* Pillar A site changes include new climate risk publications, insurance regulation updates, and IPCC meeting announcements.

* Pillar B intelligence highlights SOA's climate risk research, IFRS S2 implications for actuaries, NGFS scenario updates, and World Bank's parametric insurance work.

* Recurring actuarial implications include: disclosure and reporting obligations under IFRS S2, scenario analysis updates for pricing and reserving, and growth of parametric insurance markets for climate adaptation.
